IN THE CLAIMS:

1-3. (Cancelled)

4. (Currently Amended): An information processing method in an information processing system having an information terminal support server which supports an information terminal connected to a content server and loaded with a client program, the method comprising the steps of:

    (a)   receiving, at the information terminal support server, a message sent from the content server responding to a request from the information terminal, wherein the message includes content;

    (b)   determining whether or not said message agrees with a predetermined condition;

    (c)   editing said message to insert a command in association with the content for the client program [[when]] if said message agrees with said predetermined condition, wherein the command is executable at the information terminal to prohibit a behavior of the client program with respect to the content; and

    (d)   sending said message in [[an]] edited form to the information terminal.

5-7. (Cancelled)

8. (Currently Amended): An information terminal support server which supports an information terminal connected to a content server and loaded with a client program, the information terminal support server comprising:

    (a)   a message checker for determining whether or not a message sent from a content server in response to a request from the information terminal agrees with a predetermined condition, wherein the message includes content; and

    (b)   a message editor, editing said message to insert a command in association with the content instructing the client program [[when]] if said message agrees with said predetermined condition, wherein the command is executable at the information terminal to prohibit a behavior of the client program with respect to the content.

9-12. (Cancelled)

13. (Currently Amended): A computer program product recorded on computer readable medium for storing an information processing program executed within a system having an information terminal support server which supports an information terminal connected to a content server and loaded with a client program, the program product comprising:

(a)   computer readable means for instructing the information terminal support server to receive a message sent from the content server in response to a request from the information terminal support server, wherein the message includes content;

(b)   computer readable means for instructing the information terminal support server to determine whether or not said message agrees with a predetermined condition;

(c)   computer readable means for instructing the information terminal support server to edit said message to insert a command in association with the content providing instructions to said client program [[when]] if said message agrees with said predetermined condition, wherein the command is executable at the information terminal to prohibit a behavior of the client program with respect to the content; and

(d)   computer readable means for instructing the information terminal support to send said message in [[an]] edited form to the information terminal support server.

14. (New): The information processing method of claim 4, wherein the content is a specified field and wherein the behavior is displaying the specified field.

15. (New): The information processing method of claim 4, wherein the content is a form and wherein the behavior is alteration of the form.

16. (New): The information processing method of claim 4, wherein the content is a form and wherein the behavior is submission of the form.

17. (New): The information terminal support server of claim 8, further comprising a message sender that sends the message in edited form to the information terminal.

18. (New): The information terminal support server of claim 8, wherein the content is a specified field and wherein the behavior is displaying the specified field.

19. (New): The information terminal support server of claim 8, wherein the content is a form and wherein the behavior is alteration of the form.

20. (New): The information terminal support server of claim 8, wherein the content is a form and wherein the behavior is submission of the form.

21. (New): The computer program product recorded on computer readable medium of claim 13, wherein the content is a specified field and wherein the behavior is displaying the specified field.

22. (New): The computer program product recorded on computer readable medium of claim 13, wherein the content is a form and wherein the behavior is alteration of the form.

23. (New): The computer program product recorded on computer readable medium of claim 13, wherein the content is a form and wherein the behavior is submission of the form.
